

Carlow Cathedral Testimony

'The recent work of rebuild and restoration of the organ in Carlow Cathedral is an excellent testimony to the superior skill and craftsmanship of Derek Byrne and his colleagues of Kenneth Jones and Associates. The organ is now housed in the most handsome of new organ cases, which enhances and complements the interior architecture of the building while allowing the maximum of natural light to penetrate the building. The voicing respects the instrument's Victorian past while new tonal additions complement and enrich the original organ's romantic organ palette in a thoroughly satisfying fusion of old and new'.

Gerard Gillen

Titular Organist

Pro-Cathedral, Dublin

Emeritus Professor of Music

National University of Ireland, Maynooth
